

## HOG FUEL HANDLING SYSTEM

---

---

Client: Stothert Group for Crestbrook Forest Industries Ltd.

Value: \$ 6,000,000.00

Description: The new hog fuel handling system receives, processes, stacks, and reclaims hog fuel at a rate of 150 metric tonnes per hour to the newly converted boiler at Crestbrook's Skookumchuck Mill. The project encompassed a new truck dumper, screening system, hog hammermill/conditioning system, stacker/reclaimer (above), boiler delivery and return conveyors.

Scope: SDE provided Complete Civil, Structural and Mechanical design services for the detail design and concept review of the materials handling system.
