

KITIMAT RIVER INTAKE

Client: Alcan Smelters and Chemicals Ltd.,
Kitimat, B.C.

Value: \$4,000,000

Description: Alcan's requirements for year-round uninterrupted production water called for the construction of a new fresh-water intake system at its pumping station on the Kitimat River. The project entailed the underwater installation of two new screened intakes known as the "Johnson Screens", a protective grille, conductor pipes and a new compressor building attached to the pumping station.

Scope: SDE Provided full EPCM services
